

Casting.

Securely cast media content from mobile devices to in-room TVs.

The availability and utilization of subscription video services like Netflix, Spotify, and YouTube have become widespread. Individuals can now carry their preferred entertainment services wherever they go on their mobile devices.

Casting technology enhances the guest experience offering a personalized home-away-from-home experience, allowing guests to enjoy their content on the in-room TV in full-screen.

Easier Content Streaming for Guests

Uniguest Casting lets guests play any Chromecast enabled streaming app on their hotel room TV and keep using their device's other apps.

Features Guests Love:

- Support for 1000's of Chromecast enabled apps
- Option to deliver to Smart TV and/or Set Top Box
- Power over USB
- Device disconnection alerts
- Simple access from Interactive Portal page

Simple Content Streaming for Hotels

Uniguest Casting turns all your connected TVs into custom, digital signage that lets your brand update its messaging in minutes.

Features Hotels & Resorts Love:

- Works with nearly any TV
- Cloud-managed, monitored and updated
- Easily added to existing solutions
- Delivers a branded guest experience
- Turns TVs into digital signage
- No guest support needed
