

# Bowers & Wilkins

## T7

**T7 Wireless Portable Speaker** Bowers & Wilkins T7 combines high-quality Bluetooth wireless streaming with compact size, and rechargeable convenience for fantastic listening anywhere you are. T7 comes from Bowers & Wilkins, an audio company with close to five decades of experience creating the loudspeakers that world-leading recording studios such as Abbey Road depend upon. **Listen and you'll see.**

# Reasons to buy T7

## Acoustics

**Little speaker, big sound** Thanks to cutting-edge Bowers & Wilkins technologies, T7 delivers best-in-class sound for portable wireless speakers. The structural stiffening provided by the Micro Matrix™ technology and the high-output bass radiators ensure T7 provides real Hi-Fi sound in a compact package.

## Features

**Bluetooth aptX** T7 is our very first Bluetooth wireless speaker, featuring aptX audio coding technology. So not only can you stream audio directly from any Bluetooth-enabled device – you can do so in high-definition Hi-Fi-quality.

**Micro Matrix** Derived from the Matrix internal bracing used in our reference loudspeakers and developed as part of Bowers & Wilkins next-generation automotive audio concepts, the Micro Matrix honeycomb structure provides substantial cabinet stiffening and a solid platform for the T7's drive units.

**Portability** T7 is the most portable standalone speaker Bowers & Wilkins has ever produced. The size of a hardback book, it's designed to be picked up and carried with you; and T7's rechargeable battery gives you the freedom to take it with you wherever you go, for up to 18 hours at normal listening levels.
