VALUE-ADDED SOFTWARE SOLUTION

SuperSign Control

SuperSign Control is a basic control software. Up to 100 displays are controlled by one account with a single server. Essential factors such as power, volume, scheduling can be remotely adjusted, with firmware updates supported.

LG SuperSign Control

Monitor Signage

SIMPLE CONTENT MANAGEMENT

USB Data Cloning

USB data cloning makes managing multiple displays more efficient for optimal operation, since users don't have to set up each display one by one. Once users copy data to a USB in one display, it will be easily distributed to others through a USB plug-in.

EASIER MAINTENANCE

Real-Time Remote Monitoring

In case of malfunctions or errors, real-timeremote care is available. When an error occurs, a notification can be sent through the SNMP(Simple Network Management Protocol) protocol.

Power & Network in One Line

WOL(Wake-on-LAN) enables users to send a message through network to turn on displays. This greatly simplifies the installation and maintenance processes as only a single wire is required for power and network connection.

BETTER USABILITY

Compatibility with AV Control Systems

This LG TV has Crestron Connected® Certification, a function that is dedicated to meeting room and that meets the growing need in corporate meeting space market.

DPM (Display Power Management)

From now on, you can configure the DPM(Display Power Management) function by setting the function to on. When there is no signal, the TVs enters to DPM mode to manage power efficiently.

* It is a network based control system.
  Available AV control systems may differ by regions.

VALUE ADDED FEATURES

Time Scheduler

Create your own time scheduler of your Commercial TV. Once you set opening / closing hours and holidays, the TV will turn on/off according to work schedule.

External speaker out

Enhance the entertainment experience by adding an additional speaker. Guests listen to and control the TV audio from anywhere in the business areas, including restrooms.
