## HD entertainment with convenience and efficiency

With the Samsung LED Series 67/57/47,  
your guests will experience the viewing  
pleasure that a typical HDTV would deliver,  
but in an elegantly designed exterior.

With the REACH and My Channel feature,  
your guests receive a wider range of  
TV programming, enabling you to deliver  
diverse services directly to the display.  
Your guests will also experience a true  
home theatre experience with Soundbar  
compatibility and additional connectivity  
capabilities helping to make their stay  
more memorable. Samsung's outstanding  
TV design approach will help to elevate and  
complement the décor of the room.

Series **67** **57** **47**

### REACH (Remote Enhanced Active Control for Hospitality)

REACH is the Samsung Hospitality Display's integrated solution. It provides a simple user interface and editing tool that allows content such as EPG (program guide), property logo, hotel information and images to be updated either remotely through the advanced SIRCH device or through USB cloning on a room by room basis. Therefore, without installing IP infra, it is possible to use this solution through the existing coax cable, without the requirement to install a separate STB - saving you money.

### SIRCH (Samsung Interactive Remote Control for Hospitality)

Every manager or owner of a substantially sized hotel wants to manage their estate of TVs without visiting every room and adjusting every set individually. Our intelligent SIRCH (Samsung Interactive Remote Control for Hospitality) solution can make your life so much easier by managing your fleet of displays from one central location via air broadcast. You can configure settings, like setting up initial and maximum volumes as well as editing and updating channel lists universally and remotely.

Important firmware upgrades can also be made the same way, eliminating interruption or service limitation, and providing a better experience for your guests. The advantages to you are varied. Remote control and management significantly reduces the cost of manually updating each set, saving time, resource, and a lot of legwork.

### Energy Saving of up to 50%

Samsung's range of energy-efficient LED TVs is setting the standard when it comes to saving energy and reducing costs. Samsung Hospitality Displays are a cost effective business solution due to their energy-efficient features and ability to decrease maintenance and management oversight. Our Hospitality Displays offer a number of energy efficient advantages that are designed to lower power usage and your overall energy bill. Samsung LED technology cuts energy consumption by nearly 50% compared with Energy STAR 4.0. This means a 56" Samsung LED TV consumes the same amount of energy as a conventional 32" LCD TV. What's more, LED TVs from Samsung are durable, offering a long lifetime without loss of picture quality. Samsung Displays are also built with less harmful materials, so that the manufacturing and recycling processes are much more efficient and friendlier to the environment.

### Slim LED

Superior TVs in your rooms can provide a valuable part of a quality hotel experience. With the eye-catching yet elegant design of our slim LED Hospitality Displays, you can elevate your guest's viewing pleasure like never before. Created specifically for premium hotels, the sophisticated design of our TVs will become the focal point of your rooms. \*HA670 only

### Narrow bezel

Light and elegant, our Samsung Hospitality Displays utilise our innovative One Design approach, which minimises the surrounding frame to only 14mm/0.55inch in thickness. This revolutionary narrow bezel means that there's not only more screen to enjoy, but you can put a larger screen into an area what previously could only fit a smaller one. Well-thought out details like this is what will resonate with your affluent guests, bringing them a richer, more enhanced viewing experience, and elevating your brand for greater prestige.

### Full HD picture

Bring the pin-sharp picture quality of high-definition to every guest. With Samsung's Full HD Hospitality Displays every viewer can experience the natural beauty of reality. With twice the resolution of standard HD TVs, Full HD Samsung Hospitality Displays deliver images that defy your mind. The rich, vivid textures of full HD images invite your guests to enjoy a viewing experience that redefines reality, and leaves them with a positive impression of your brand.

### Put your guests in control with My Channel

Whatever their country of origin or language, you can make your guests really feel at home with Samsung Hospitality Displays. Our My Channel has been designed for maximum convenience. It allows your guests to access channels according to their personal preference, by selecting their country and genre. This way, guests can find and enjoy their desired channels quickly and efficiently. This offers a valuable timesaving benefit, as there is now no need to 'trawl' the menu looking for their favourite TV show or movie.

### Integrated external clock

The exterior of the Samsung Hospitality Display is integrated with an easy-to-read external clock so your guests can easily check the current time and manage schedule with external clock on TV. The clock has a back-up power supply so if the power goes out you don't have to set up the time again as the clock will run accurately without any external power for up to 72 hours. \* HA475 only

### Multi-code remote up to 10 TVs

With the Samsung Hospitality Display TV's multi-code remote up to 10 TVs can be controlled individually in the same room. For application in gym and hospital environments this means guests can enjoy watching TV without annoying interference from other remote signals.

### Swivel stand with optional stops

Samsung Hospitality Displays pedestal stand rotates 90 degrees in both directions with optional 20, 60 and 90 degree stops so wherever in the room your guests are they should have an excellent view of their TV.

### Soundbar Compatibility

Samsung Hospitality Displays enable Soundbar compatibility by supporting HDMI-CEC. By connecting the Soundbar to the Samsung Hospitality Display with a HDMI cable the TV audio settings and menu lock feature are automatically applied, so you don't have to set up the Soundbar separately and you can also prevent guests from changing the settings. With one single remote, guests can control both TV and Soundbar simultaneously. The Samsung wall-mountable Soundbar allows you to offer your guests a full 3D surround sound experience through one easy to install device that fits into the most prestigious environment and adds a touch of elegance to your rooms.

### Management solution

#### • Easy Installation and Setup

Samsung Hospitality Displays include easy-to-follow, step-by-step onscreen instructions that guide you through the entire installation process.

#### • USB cloning (for quick TV setting & upgrade)

To help you work more efficiently, the innovative USB Cloning feature allows you to easily customise and then copy settings such as channels, picture, volume and logo display across your entire TV estate, saving you time from adjusting the settings on each individual box.

#### • Channel Manager

Easily manage the channel mix and arrangement of both analogue and digital channels for each Samsung Hospitality Display regardless of the system. Channel mapping allows you to rename and reorder channels to your preference.

#### • Welcome Message and logo display

Generate awareness and enhance your brand image through your logo display and welcome message to all guests. This can be displayed for an adjustable period of 3-7 seconds.

### Security solution

#### • Anti-theft Battery Cover

Replacing stolen batteries can become costly over time that's why Samsung Hospitality Display remotes were designed with a special battery cover that is screwed on.

#### • Fire Resistant Casing

To help prevent fire damage to your Hospitality TV estate the casings for Samsung Hospitality Displays use a flame retardant material that is able to withstand extremely high temperatures and is also non-flammable to prevent any fire from spreading

### Energy efficiency solution

#### • Energy saving mode

With Samsung's Energy Saving Mode you can select from three pre-defined optimised settings that control the amount of energy the TVs use.

#### • Music mode

When a guest has connected an external device to the Samsung Hospitality Display to play music the panel backlight can be turned off thus decreasing the power consumption of the unit when in music mode.

### Hospital solution

#### • Samsung Purecare Remote

With Samsung's Energy Saving Mode you can select from three pre-defined optimised settings that control the amount of energy the TVs use.

### Guest convenience

#### • Software Clock

Through pressing the "info" button on the Samsung Hospitality Display's remote your guests can check the current time even if the TV is turned off.

#### • Remote Jack Pack Compatible

Through the Jack Pack your guests can connect and play various electronic devices from laptops to cameras to the TV.

#### • Headphone Output and Headphone ID

Samsung Hospitality Displays have a headphone socket to plug headphones in directly and the Headphone ID can detect the connected headphones to a bed or table in the same room. In a hotel or hospital environment you can extend the headphone cable without any hassle.

#### • External Speaker Output

With the Samsung Hospitality Display, you can connect the sound to other parts of the room or for example to a bathroom speaker, so your guests can hear the TV wherever they are.

#### • Auto sensing input

Auto Sensing enables the Samsung Hospitality Display to automatically detect any compatible digital device that is connected to the TV via HDMI or USB without the user needing to adjust the mode.

#### • Multimedia Connectivity – USB 2.0

Guests can enjoy their own movies, music and images by simply plugging their USB into the Samsung Hospitality Display with no format limitation.
